Quality Policy Statement

It is the Policy of Geothermal International to design, supply, install and optimise equipment for our customers to the highest standards of Quality, Reliability, Performance and Installation Quality that are consistent with profitable trading. All employees are committed to this policy and must work within the framework of our Quality System, which is based on the international Quality Management System Standard BS EN ISO 9001:2008.

Overall responsibility for the quality of design and service delivered lies with the Chief Executive Officer.

The Top Management team are responsible for the continual improvement in the effectiveness of the documented Quality System.

Day to day responsibility for product and process quality resides with line management. The Management Representative is responsible for reporting the performance of and maintaining the documented Quality System.
